Premier League home advantage 2005-06 to 2025-26, Poisson MLE per season (380 matches each)
95% CIs from 2000 bootstrap resamples. Identity: γ̂ = Σ home goals / Σ away goals; extra home goals = mean H − mean A
season γ̂ = ΣH/ΣA, 95% CI
2020-21 (closed doors)
2024-25 (full stadiums)
common γ, 20 seasons excl. 2020-21: 1.301 [1.270, 1.337]
random-effects 95% range for one season (τ = 0.060)
